Objective

Mid-Level Full Stack Developer

Summary

I am a professional with over 5 years of experience in software development, working on backend and frontend (fullstack). Key skills include:

Languages: C#, JavaScript, TypeScript, Python

Architectures: MVC, MVVM, CQRS

Databases: SQL Server

DevOps: Azure DevOps, Docker, Git, Heroku

Back-end: .NET Core, .NET, Node.js, Windows Forms

Front-end: HTML, CSS, Angular, jQuery, Bootstrap, Figma

Education & Languages

- Associate Degree in Systems Analysis and Development - IBMR University Center – Feb 2025 (expected)
- Technical Degree in Computer Science – Cefet/RJ – Feb 2018
- Intermediate English

Professional Experience

TOTVS

Jun 2023 – Jan 2025

Mid-Level Full Stack Developer

- Responsible for maintaining and improving the payroll system in the RM line, focusing on integration with the Feedz platform;
- Identified and implemented payroll process improvements, reducing operational costs.
- Designed and developed a Python tool to generate dashboards and monitor unit test coverage history by integrating daily data via SonarQube API, providing clear trend analysis and code quality metrics.
- Enhanced RM system performance evaluation processes, achieving a 60% performance increase for a specific client.

Key Technologies: C#, Windows Forms, Python, Angular, .NET Framework, Smart View.

Target Bank

May 2022 – May 2023

Junior Development Analyst

- Worked on maintaining and developing internal banking management systems, improving payroll systems, and collaborating with the IT team on various initiatives.

Key Technologies: C#, xUnit, Azure DevOps, JavaScript, .NET Core, Docker, Git, SQL Server.

3CON

Jun 2021 – Apr 2022

Junior Developer

Client Nokia: Maintenance of a logistics system using .NET Framework (backend) and Angular 8 (frontend). Contributed to upgrading to Angular 13. Gained experience with TFVC.

Client MyHive: Developed frontend screens using React. Utilized Git for version control and Jira for project management.

Key Technologies: C#, TFVC, React.JS, TypeScript, .Net Framework, Angular 2+, Git.

Nokia do Brasil

Feb 2019 – Jun 2021

Junior Systems Development Technician

Oct 2020 – Jun 2021

Developed tools for overtime tracking and administrative process optimization using JavaScript, HTML5, and CSS3.

Key Technologies: JavaScript, Node.JS, HTML, CSS, SQL Server, Python, TypeScript, .NET Framework

Apprentice

Feb 2019 – Oct 2020

Full-stack development with Node.js and Vue.js.

Key Technologies: JavaScript, Node.JS, HTML, CSS, SQL Server, Python, Vue.JS

Certifications & Courses

SOLID with C#: Object-Oriented Programming Principles – Alura – Jun 2022

Building Web APIs with ASP.NET Core in .NET 6 – LinkedIn – Mar 2022

Introduction to Git and GitHub – DIO – May 2021

Advanced JavaScript ES6 Development – DIO – Apr 2021
